## BIOLOGY 204

Do you love being outdoors? Then you'll love this one-week field biology class to be held at the Pierce Cedar Creek Institute. Bi 204 (4 credits) is a field-based biological experience introducing the student to the biodiversity, ecology, and natural history of selected ecosystems throughout the world. The on-site class will allow the student to examine the ecosystems under study through first-hand observation and/or research projects. Library research, a scientific paper, and/or an oral presentation may be required. NOTE: The cost of transportation, food, and lodging, and the cost of various excursions will be borne by the student.

The 660-acre Institute, located just 25 miles from Grand Rapids, provides students with a unique exposure to a rare blend of diverse habitats including wetlands, forests, marshes, streams, lakes, and prairies.

SUMMER SESSIONS	May 15 to 21 and August 7 to 13
ENROLLMENT	Limited to 16 students per session
TUITION	Based on current costs for a 4-credit course
ROOM & MEALS	\$365.00 covers ALL room and board charges
CREDITS	4 science credits
TRANSFER	Transfers to all 4-year colleges and universities

One student's review: "What an opportunity...I loved every minute and met so many students with similar interests in ecology and the environment. I would do it again in a heartbeat!"
